

4-Tier Drug Program

Preferred Drug List

Powered By:

Welcome...

This plan is designed to save you money on your prescription drug costs!

Your Prescription Plan is recognized at most pharmacies in the United States.

This product guide has four tiers:

The first tier is preferred brand and generic drugs that will be available to you for \$10 or less for the scheduled quantity and dose.

The second tier is preferred brand and generic drugs that will be available to you for \$20 or less for the scheduled quantity and dose.

The third tier is preferred brand and generic drugs that will be available to you for \$ 40 or less for the scheduled quantity and dose.

The fourth tier is non-preferred brand and generic drugs that we have negotiated a special discount price for you.

To get the most out of this program you should ask your doctor to prescribe a drug within the first three tiers if possible. Often times drugs within the same therapeutic class can be prescribed in place of an expensive brand name drug. Of course if you choose the higher price non-preferred brand or generic name drug we have negotiated a substantial discount for you.

Please review this entire book. Read the “frequently asked questions” section for information about this plan. Feel free to contact our customer service center if you have additional questions.

Our knowledgeable Help Desk and Customer Service department ensures that all physician, member, and pharmacy calls are responded to swiftly and accurately. Our prompt customer service help desk is available toll free from Monday through Friday - 8:30 a.m. to 8 p.m. (Eastern time).

FREQUENTLY ASKED QUESTIONS

Where can I use my card?

Your card is accepted at over 54,000 participating pharmacies throughout the United States. The network includes pharmacy chains, such as CVS, Rite Aid, Medicine Shoppe, Walgreens, Wal-Mart, and more, as well as thousands of independent pharmacies throughout the country. Pharmacy location information can be obtained by contacting customer service. If a neighborhood pharmacy is not already participating in our network, please have them call us. We will send them information about how they can participate in the network so that you can take advantage of the savings as soon as possible.

What if my pharmacy doesn't recognize the card?

Pharmacies may not be familiar with every prescription program in which they participate. If the pharmacist does not recognize your card or if you encounter a problem at the pharmacy, DO NOT leave without having the pharmacy call the toll-free number printed on the ID card.

What is my average discount on Non-Preferred Drugs?

Members are currently receiving an average discount of approximately 19% on brand name drugs. There is no guaranteed percentage savings on every prescription purchase. The price paid depends upon the pharmacy and the type and quantity of drug purchased. Pharmacies, just like other retail stores, compete against each other and may have special prices on some products. When this is the case, we cannot discount the pharmacy's already low price, but a member will receive the advantage of the pharmacy's special pricing. **THE MEMBER ALWAYS RECEIVES THE LOWER OF THE CONTRACT PRICE OR THE PHARMACY'S PRICE.**

What is a generic drug?

Once a patent on a brand name drug expires, other drug companies may make a generic version of the drug, with the approval of the Food and Drug Administration (FDA). The FDA's standards for quality are the same for all manufacturers. This means the generic drug contains the same active ingredients as the brand name whose patent has expired, and that it is as safe, potent and effective.

How can I keep my prescription drug costs down?

The use of generic prescription drugs, whenever available, is most cost effective. Don't be shy - discuss your prescription options with your doctor. Ask whether an alternative, less expensive option would work for your condition.

How will I know if there's a generic equivalent available?

Simply ask your local pharmacist or call the Customer Service Department to find out about generic equivalents for your prescription. Also ask your doctor to prescribe generics whenever possible and appropriate. (Your enrollment packet will include helpful materials you can share with your doctor.)

What is the difference between brand name and generic drugs?

The brand name is the trade name under which the product is advertised and sold, and is protected by patents so that it can only be produced by one manufacturer for a pre-determined number of years. Once a patent expires, other companies may manufacture a generic equivalent, providing they follow stringent FDA regulations for safety. Generic drugs are drugs for which the patent has expired, allowing other manufacturers to produce and distribute the product under a generic name. Generics are essentially a chemical copy of their brand name equivalents. The color or shape may be different, but the active ingredients must be the same for both. The preferred drug list contains only FDA approved generic medications.

What is a preferred drug list?

A preferred drug list is a list of recommended prescription medications that is created, reviewed and continually updated by a team of physicians and pharmacists. The preferred drug list contains a wide range of generic and brand name preferred products that have been approved by the Food and Drug Administration (FDA). Your doctor can use this list to select medications for your health care needs, while helping you maximize your prescription drug benefit. A medication becomes a preferred drug based first on safety and efficacy, then on cost-effectiveness.

What is the difference between a preferred brand name drug vs. a non-preferred brand name drug?

A preferred brand name drug is a medication that has been reviewed and approved by a group of physicians and pharmacists, and has been selected for preferred status based on its proven clinical and cost effectiveness. A non-preferred brand name drug is a medication that has been reviewed by the same team of physicians and pharmacists who determined that an alternative drug that is clinically equivalent and most cost effective is available. These designations may change as new clinical information becomes available.

What drugs are considered preferred (formulary) on Discount Plans?

The Product Guide contains certain brand drugs for which the member's price is the scheduled amount listed. Drugs that are chemically or therapeutically similar to drugs listed on the Product Guide are not discounted. Prices are subject to change due to manufacturer price changes to pharmacies. On these drugs, the participant enjoys two distinct discounts; one through the pharmacy network and the second through the manufacturer.

What if the brand drug I am taking is not discounted?

If you are currently taking a medication that has similar active ingredients or is used to treat the same conditions as the preferred brand drugs on the product guide, it will still be discounted. You will pay the negotiated price for that drug. To take advantage of the potential program savings on listed preferred drugs, you should ask your Pharmacist (where regulations permit) or a Doctor to change your medication, where medically appropriate, to a less expensive product listed in the product guide.

PHARMACY NETWORK

Your prescription card is accepted at over 54,000 participating pharmacies throughout the United States. The network includes pharmacy chains, such as CVS, Rite Aid, Medicine Shoppe, Walgreens, Wal-Mart, and more, as well as thousands of independent pharmacies throughout the country.
